

Independent analysis of traffic volume data as provided by the City of Victoria and from online sources (VicMap): Richardson Street Corridor Project

- 7 points - collected 2015-2019 + school in session
 - 6 points - collected 2015-2019 + schools not in session
 - 12 points - collected 2020/21 + schools not in session
 - 23 points - collected 2020/21 + schools in session
- 48 data points total

■ Traffic diversions

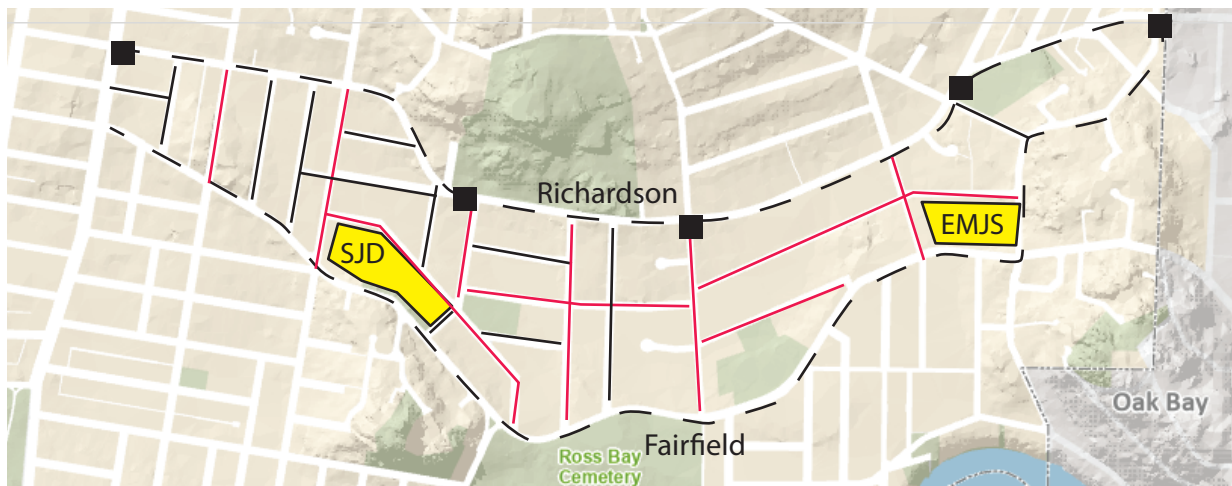

- Not on Map:
- 0 block Moss Street
 - 1000 block Moss Street
 - 900 block Foul Bay Road
 - 900 block Foul Bay Road
 - 1100 block Rockland
 - 1700 block Rockland

15%

of traffic volume data was collected during school days before the 2020/21 pandemic

85%

of traffic volume data was collected either when school was not in session and/or during the 2020/21 pandemic

- no data provided or available
- existing data collected in 2020/21 (Covid-19 pandemic) and/or schools not in session

When taking a closer look at the data points themselves,

100%

of north-south and east-west neighbourhood and school streets in between Richardson and Fairfield only have traffic volume data collected during the 2020/21 pandemic or when schools were not in session
